Chometz is any substance that contains leavening from one of five cereal grains (wheat, barley, oats, spelt, or rye) caused by its prolonged contact with water or other liquids. It is important to note that Chometz/Se'or does NOT translate into "yeast". It refers to leavening: namely self-rising from a sour-dough starter type of process. The prohibition of Chometz on Pesach includes "Chometz Gomur" (unadulterated Chometz) and "Ta'aruvos Chometz" (a mixture containing real Chometz).

There are three areas with which we must be concerned when evaluating Chometz. First, there is "Isur Hana’ah". This means that one may not derive any pleasure or benefit whatsoever from Chometz. This prohibition extends to possession of Chometz anywhere in the world (such as in a boat, office, mountain retreat, etc.). Thirdly, there is a prohibition against having Chometz in one’s possession. One must be careful to remove all Chometz, not sold, from their premises. Chometz that was sold should, preferably, be stored in an inaccessible area. Jews may not leave unsold Chometz in their possession on Pesach, even if they do not intend to use it. One should be careful not to send a package which contains Chometz too close to Pesach, as it may arrive during Pesach.

The following are actual Chometz: bread, cake, cereal made from wheat, oats or barley, cookies, farfel mix, some licorice, pasta, pretzels, rolled oats, wheat gluten, wheat protein. Some have the same custom concerning beer and whiskey.

### STANDARDS OF KASHRUS

With over 1,000 Kosher certifying agencies and individuals competing in the Kosher certifying business, it is expected that standards will vary. While most keep to a basic acceptable standard, some do not. We still see gelatin from non-Kosher animals being used, (often listed as "k-Gelatin"), corn syrup as an ingredient in Passover products (with a long reference attempting to legitimize it), carmine (from bugs) used as red coloring, as well as many other questionable ingredients. With the vast number of products being certified by reliable agencies and individuals, it would seem to be much less tempting to allow for these lenient opinions to lessen our observance of Pesach. Additionally, some establishments only offer “Kosher style” products for Pesach, while the lenient word “style” is missed by many. Some food establishments offer a Passover taco bar, ham on Matzah special and Passover “challah”, among other things. The only protection as far as the government is concerned is from Assembly Bill 295, section 1329.29, passed in March of 1993. It states: “No person shall do any of the following: Make any direct statement, either orally or in writing, display the words “Kosher”, “Kosher style”, “Kosher type”, “Kosher for Passover”, “Jewish”, or “Hebrew” in any language or display any insignia, six pointed star, or other mark that might reasonably be calculated to deceive or lead a reasonable person to believe a product is “Kosher” or sanctioned by Orthodox Hebrew religious requirements, if it is not”. Obviously one needs to be vigilant in carefully watching for proper certification.

### KITNIYOS

Due to the stringency of the prohibition of not eating Chometz on Pesach, Ashkenazic Jews, as well as many Sephardim, have developed a custom not to eat Kitniyos (legumes) on Pesach other than for infants and under other special circumstances provided that the foods are prepared in separate
utensils. Kitniyos includes beans, soy, rice, peas, and corn among others: (see below). Sephardim, whose minhag (custom) permits them to eat rice on Pesach, must be careful to determine that the rice is additive-free. Many Sephardim have the minhag to check the rice three times, as well as to check for other grains that may be mixed in. In any case, open bins in stores should not be used. This year, the Star-K Kashrus organization is certifying Carolina Mehadrin Rice for use for Sephardim on Pesach.

Ashkenazim refrain from eating peanuts as well. However, this restriction regarding peanuts may not include peanut oil (according to the opinion of Rav Moshe Feinstein ZT"L.) Legumes are permitted for some Sephardic Jews who, for various historical reasons, did not adopt this custom of refraining from kitniyos consumption on Pesach. A reliable source of acceptable products following this Sephardic custom is the Sephardi division of the J.S.O.R. at (732) 531-4872 or WWW.JSOR.ORG (be aware that a number of lists exist for Sephardim that are extremely misleading and erroneous).

For this reason the kosher consumer is confronted every year around Pesach time with a confusing array of Kosher certifications found on candy, jam, mustard and other products containing legumes. In reality, these products are edible on Pesach by only certain groups of Jews. Many, but not all, will state “Leochlei Kitniyos - only for those who eat kitniyos”. Some examples of this are sunflower seeds, canned vegetables, halva etc. Every Jew, however, is permitted to derive benefit from kitniyos (such as pet food, glue, baby formula etc.).

The following are considered kitniyos or treated as kitniyos according to many opinions:

Alfalfa Sprouts, Anise, Ascorbic Acid (May be Chometz), Aspartame (Nutrasweet), Beans, Black Eyed Peas, Buckwheat, Calcium Ascorbate, Canola Oil, Caraway, Citric Acid (May be Chometz), Chickpeas, Confectioners’ Sugar with corn starch, Coriander, Corn, Corn Syrup, Cumin, Dextrose, Fennel, Fenugreek, Flax Seeds, Hemp (unchecked), Hydrolyzed Vegetable Oil, Kasha, Kimmel, Lecithin, Lentils, Licorice, Lucerne, Lupine, Malto Dextrins (Chometz or kitniyos-derived), Millet, MSG, Mustard, Peanuts, Poly-sorbates (May be Chometz), Popcorn, Poppy Seeds, Pumpkin Seeds, Rice (Vitamins added may be Chometz), Sesame Seeds, Snow Peas, Sodium Citrate (May be Chometz), Sodium Erythorbate (May be Chometz), Sorbitol (Could be Chometz if outside the U.S.), Soy Oil, Corn Oil, Soy, String Beans, Sunflower Seeds, Tofu (from soy), Vitamin C (may be Chometz), Wild Rice, Xanthan gum (May be Chometz).

Note: Flax seed, chia and Hemp seed are not actually kitniyos and can be used after checking for other grains.

**GOING AWAY FOR PESACH**

One must sell his/her Chometz regardless of where they are for Pesach. This is the case even if one left home 30 days before Pesach and no one will be in the house during Pesach. It is necessary to inform the Rabbi selling your Chometz as to the location of the Chometz and to your location during Pesach so that he can know the proper time zones of selling and buying back the Chometz for you.

If a person leaves home before Pesach, within 30 days of Pesach, the night before his/her departure should do a regular Bedikas Chometz without a Bracha and recite “Kol Chamira” for the Chometz found in the house. Note: Kol Chamira should always be said in a language that one understands, as this is not a Tefilla, but a declaration. The alternative to an early Bedikas is to appoint a Shaliach (messenger) to do a regular Bedikas Chometz with a Bracha on the proper night of Bedikas Chometz.

A guest in a hotel, who is in the hotel on the night of Bedikas Chometz should conduct themselves as they would at home, performing a full Bedikas with a Bracha. It is the minhag to carefully put out pieces of Chometz before beginning the Bedika.

It is preferable to empty a stocked hotel fridge of beer, cookies etc. before Pesach begins. If this is not possible, minimally, the fridge should be taped or locked shut.

A guest for Pesach at a relative’s house should hear the Bracha from the owner of the house and then make his/her own Bedika in their room.

**BITUL (ANNULMENT) OF CHOMETZ**

During the year, any non-Kosher ingredients which are inadvertently mixed with Kosher ingredients may be Halachically (according to Jewish law) fit to eat. The reason for this leniency is that they are declared “Batel Beshishim” (annulled in sixty i.e. the Kosher food is at least sixty times greater than the non-Kosher, thus making the non-Kosher food annulled). This rule is true regarding Chometz on Pesach only if the mixture was made before Pesach. During Pesach, the laws of “bitul” are not applicable. In other words, during the week of Pesach, if even a tiny amount of Chometz falls into a large amount of “Kosher for Pesach” food, it renders the food, as well as the pot, unfit for use on Pesach. As in all such Halachic questions, a competent Rav should be consulted.

Note: Lactaid drops may contain Chometz. Therefore, they should be added to milk before Pesach to have the Chometz annulled in sixty times the amount of milk, applesauce etc.
CONSUMPTION OF CHOMETZ

Since the prohibition of eating Chometz on Pesach applies not only to Chometz itself, but to any derivatives of Chometz or to any product that may contain Chometz, one should make certain that all food products that are bought for Pesach should have a certification by a reliable Kashrus organization or Orthodox Rabbi.

HANA’AH (BENEFIT) FROM CHOMETZ

During Pesach, we may not derive any sort of benefit from Chometz. Therefore, Chometz may not be sold or used, even in business transactions or as pet food. Even some cosmetics must be Chometz-free. Generally, there is no problem with the following products if they are not organic in nature, and do not contain any grain by-products: Acne Aid, Mineral Oil, Baby Cream, Baby Oil, Eye Liner, Mascara, Rouge (Powder), Nail Polish, Talcum Powder, Stick Powder Deodorant, and Vaseline.

MECHIRAS (SELLING OF) CHOMETZ

“Mechiras Chometz” is the sale of Jewish owned Chometz to a non-Jew before Pesach. One must sell Chometz which is in their regular home, vacation home, office etc. If one cannot sell their Chometz through their local Rabbi, numerous sites on-line will facilitate this transaction. This transfer of Chometz to a non-Jew is a legal and binding sale, complete with contract. This sale is transacted through a Rabbi, who acts as a legal agent to sell the Jew’s Chometz to a non-Jew. The Rabbi enters into an agreement with the non-Jew for the sale of this Chometz. The Chometz that has been sold must be placed in an area which is completely sealed off, and must remain there throughout the holiday of Pesach. One must be careful to inform the Rabbi if they intend to be in a different time zone for Pesach. They do not want to have their Chometz bought back if it is still Pesach where they are (i.e. overseas, etc.) If one leaves home within 30 days of Pesach and will not return before Pesach, they should either check for Chometz the night before they leave or appoint someone to check for them on the regular night of B’dkas Chometz. If the checking is done before the bdikah night one does not say a Bracha. A person can sell all the Chometz in their home before leaving and check only one room for Chometz. Regardless, a person needs to say the Bittul (annulment) of Chometz at its regular time of Erev Pesach.

CHOMETZ SHE’AVAR ALAV HAPESACH

(BUYING CHOMETZ AFTER PESACH)

Due to the severity of the “Issur” (prohibition) of Chometz, Chazal reinforced the sale of Chometz with a fine. This fine was levied on any Jews who kept Chometz in their possession or ownership during Pesach. This is called “Chometz She’avar Alav HaPesach.” Jewish law requires that if a Jew owns Chometz on Pesach, no Jew is allowed to eat that food, even after Pesach. Therefore, we are also prohibited from buying in stores which are Jewish owned, if they have not sold their Chometz. It is important to note that although we may not buy Chometz from such Jewishly owned stores that did not sell their Chometz, we may purchase non-Chometz food products from these stores. Actual Chometz products that are prohibited in these stores would be pasta, cereal from grain, bread, beer, cookies/crackers, malt, maltose, pretzels, soy sauce, wheat germ, wheat protein, whiskey, dog/cat food containing grain etc.

Some common products that one may assume are Chometz, but are actually not, and therefore may be purchased in a store that did not sell their Chometz are the following… baker’s yeast, cosmetics, dry cake mixes, kitniyos, glue containing Chometz, ketchup, mayonnaise, mustard, pickles, medicine containing Chometz, maltodextrin, maltose, malt flavoring, food coloring, flour, extracts, raw pearled barley, vanilla and vitamins/medicine containing Chometz.

Rav Moshe Feinstein ZT”L, in his sefer “Igros Moshe”, states that if a Jew sold his Chometz for Pesach, and then kept his store open during Pesach and continued to sell items of Chometz, one is nevertheless allowed to buy from that store after Pesach.

A JEW MAY BUY FROM THE FOLLOWING STORES IMMEDIATELY AFTER PESACH:

7-Eleven
99 cent store
Albertsons
Beverly
Big Lots
Bristol Farms
Coffee Bean
Costco
CVS
Dollar Tree
Erewhon
Food4Less
Fresh & Easy
Gelson’s
Jetro/Restaurant Depot
Jon’s
K-Mart
Nuts & More
Petco
Petsmart
Ralphs/Kroger
Rite Aid
Sadaf
Safeway
Sam’s Club
Smart & Final
Smith’s
Trader Joe’s,
Vons / Pavilions
Walgreens
Walmart
Wine & Liquor Depot
Whole Foods
and all reliably Kosher certified stores are fine to shop in for Chometz after Pesach. Reliably certified Kosher stores all sell their Chometz before Pesach.

Note: Rabbi Elmaliach, the Rabbi in charge of Kashrus at Ben Gurion airport, reports that the stores at area D7 in the airport are clear of Chometz.
She’avar Olav Hapesach. There is a restaurant in the Ben Gurion airport called “Aroma Espresso Bar”, under Chug Chosom Sofer Hashgacha and it is fine to eat there after Pesach. The other stores in other areas of the airport, had their Chometz sold but were open on Pesach and continued to sell Chometz during Pesach. Some poskim allow purchases from such establishments after Pesach, while some do not.

**KASHERING**

**(MAKING UTENSILS KOSHER)**

Utensils that are used during the year for Chometz may not be used to prepare food for Pesach unless they are properly Kashered.

Cloth tablecloths (not plastic) and towels used year round should be washed thoroughly and may then be used for Pesach.

Surfaces upon which only cold Chometz has been placed during the year, such as refrigerators and pantry shelves, should be thoroughly washed and rinsed to prepare them for Pesach use. Surfaces which are used for hot Chometz during the year, in addition, whenever possible must be Kashered by pouring hot water on them. Surfaces that cannot be Kashered (such as formica and ceramic tiles etc.) should first be cleaned thoroughly and then covered with non absorbent material (i.e. contact paper, cardboard or multiple layers of aluminum foil).

**THE DIFFERENT LEVELS OF KASHERING:**

Libbun Gomur - torching or making the metal glow.

Libun Kal - heating the metal until it can burn paper on the other side.

Hagolo - dipping in boiling water.

Eruy Roschim - pouring boiling water. (Note: steamers usually do not work)

The general rule is that we undo as we did. If something uses straight dry heat (i.e. bbq) we need to torch it or use self clean in an oven which is the same. Soup pots are used with liquid so they are kashered with liquid in boiling water etc.

**TO KASHER:**

Electric range, first scour it thoroughly. Then, turn it on to the highest temperature setting for 15 minutes, or until it gets red hot.

Enamel glazed stove tops should be covered during Pesach.

Gas grates should be put in the oven for Kashering or torched.

Glass-top stoves can be Kashered in the area of the burners. They should be turned to high for 15 minutes. The areas in between cannot be Kashered. Some find it practical to change the entire glass top for Pesach.

A **non self-cleaning oven** should be cleaned with a special solution, such as “Easy Off” and not used for 24 hours. After this time, it should be turned on to the maximum setting for one hour. This will Kasher the oven, but not the broiler.

The **broiler pan** cannot be Kashered, therefore, it is usually not used for Pesach. If the broiler pan is replaced, the broiler can be Kashered in a similar fashion as the oven. If one desires to Kasher it, “Libbun” (glowing hot) is required (i.e. by using a torch).

A **self cleaning oven** needs only to go thru one self clean cycle. It can be on the shortest cycle of your self-cleaning oven.

Many microwave ovens (those whose walls do not exceed 120 degrees during cooking) without browning elements or convection can be Kashered by first cleaning them and not using them for 24 hours, and then putting a new glass tray, or cardboard on the bottom. Afterwards, a cup or bowl of water should be boiled inside.

A **barbecue** must be Kashered with “Libun Gamur” which includes torching any surface that food comes in contact with, in addition to cleaning and burning out the rest of the barbecue. In addition, the coals or lava rock should be replaced. Often, it is more practical to purchase a new one for Pesach.

A **stainless steel sink** is Kashered after it has first been cleaned, and then kept free from hot water usage for 24 hours. Then boiling water must be poured over its entire surface. Porcelain sinks, however, may not be Kashered. They should be fully lined with a tin insert, contact paper, aluminum foil, or a Pesach basin insert.

Dishwashers may be Kashered only if they have a stainless steel interior. All racks must be changed. After waiting 24 hours, run a complete cycle with soap. All rubber or plastic parts must be replaced as well.

Metal utensils that are used with liquid (soup pots, etc.) may be Kashered by first cleaning them, not using them for 24 hours, and finally, completely immersing them in a Kashered pot full of boiling water for 15 seconds, followed by rinsing them in cold water immediately upon removal. They should be Kashered one at a time. An alternate method, particularly useful for larger pots, is to set aside the pot for 24 hours, after which time it should be filled with water and then be brought to a boil. A glowing hot item, such as a rock, should then be placed...
inside, allowing the hot water to spill over the sides. Braces, bite plates and retainers should be brushed thoroughly before Pesach.

Countertops that cannot be Kashered: Formica, Silestone, Composite Stone and Corian counter tops may NOT be Kashered for Pesach, and therefore, should be covered. Caesarstone countertops may NOT be Kashered for Pesach according to many opinions, as they are composed of only 93% stone.

Countertops that may be Kashered: Granite, Marble, metal, stone, or Stainless Steel counter tops may be Kashered by pouring boiling hot water (not steam) on them (Eirui). wood can be kashered with sanding.

The following materials are subject to differing opinions if they can be Kashered: China, Corelle, Corian, Cork, Corningware, Duralex, Earthware, Enamel Coated Formica, Melmak, Nylon, Plastic, Porcelain, Pyrex, Synthetic Rubber, Teflon Coating. Some of the above are agreed upon that they cannot be kashered. Ask your local rabbi.

NOTE: STEAM CLEANERS often may not be used for Kashering purposes, as Kashering must be done with boiling water (212F) as steam is insufficient.

Water filter - change the filter.

KITCHEN ITEMS THAT MAY NOT BE KASHERED:

- Arcolac
- Bread Machines
- China
- Collanders (plastic)
- Corelle
- Corning Ware
- Crockpots
- Graters (any)
- Knives with Plastic Handles
- Melmac
- Mixers
- Pasta Maker

These items should be washed thoroughly and be put away in a completely sealed off area until after Pesach.

EREV PESACH

Bedikas Chometz: The search begins Thursday night, 4/18. Many have the Minhag to place ten pieces of bread or crackers in a bag out before the search is started.

Fast of the First Born: This year the fast falls on Friday, 4/19.

Siyum: Males who are first born and do not wish to fast on Friday should attend a Siyum in the morning and eat at the meal following it. This meal is called a Seudas Mitzvah. It is generally held right after Davening.

Biur Chometz: The burning of the Chometz left in one's possession, including the Chometz found the previous night, must be burned by the end of the fifth hour on Friday morning (4/19). Please see time chart for the exact latest time.

Selling of the Chometz: This must be done by Friday morning 4/19, no later than the time of Biur Chometz

EATING ON EREV PESACH

Consumption of Chometz is prohibited on Erev Pesach, from a third of the day and after- this is usually counted four proportional hours from daybreak (see times to remember). It is also forbidden to eat Matzo or anything baked with Matzo on Erev Pesach. This prohibition includes egg Matzoh. This is in order to ensure that one will eat the Matzo at the Seder with a “hearty appetite”. This prohibition includes cakes and cookies made from matzo meal. However, cooked Matzo products, such as knaidlach (Matzo balls) are permitted. Non-Gebrochts products are suitable for this time period. All foods should only be eaten in moderation from the ninth hour in the day and on in order to have an appetite for the Seder. Imitation Matzo made from Tapioca and Potato ingredients is fine for Erev Pesach.

SELECTED LAWS & CUSTOMS

One should prepare everything (for the first Seder) on Erev Pesach in order that the Seder should begin immediately upon arriving from Shul. This includes setting the table, etc. It is a custom that pillows should be prepared for leaning on during the Seder. Women are not required to lean, however, male children are. It is also a custom among some that the head of the household wears a Kittel during the Seder. In most places, the custom is that only the head of the household has a Seder plate and the three Matzos. Some, however, have a Seder plate and Matzos for each man present at the Seder. When only the head of the household has a Seder plate, he must provide for everyone at the Seder from his plate. Since there is usually not a sufficient amount of Matzo, Marror and wine to ensure that everyone present (male and female alike) has the required amounts during the Seder, additional Matzo, Marror and wine should be placed on the table for supplementary use.

THE SEDER PLATE

One may not use MARROR (to fulfill the Mitzvah of Marror) that was soaked for 24 hours or longer.
Soaking this long is called pickling and is Halachically considered cooking. One may only use uncooked vegetables for Marror. (Do not lean when eating Marror.)

CHAROSES can be made of ground apples, pears, pomegranates, dates, figs, walnuts, almonds, ginger and cinnamon, to which wine is added. Recipes may vary according to tradition.

KARPAS is any vegetable upon which a Brocho of “HaAdam” is made, that may be dipped in salt water or vinegar, and that may be used on Pesach. Parsley, celery, and potatoes are often used as Karpas.

ZROA is a piece of meat which is roasted over the fire. Most people use a chicken neck or wing for this purpose.

BAITZA is an ordinary hard boiled or roasted egg. If one forgot to roast the Zroa or Baitza on Erev Pesach, and had to do it at night, he must eat the egg before sunset of the next day.

THE ARBA KOSOS (FOUR CUPS OF WINE)

It is preferable that the wine used at the Seder be red in color. For those who cannot drink wine, grape juice may be used (consult your Rabbi). If one must drink grape juice the 64 oz glass bottles that say on them Non-Mevushal are preferable. Nevertheless, one should make every effort to drink wine at the Seder. It is preferable to add at least some wine to the grape juice.

Each cup of wine should contain at least 3.3 fluid ounces. It is preferable to drink the entire cup, or at least half of it, for each of the four cups. Due to this one should not use a very large cup as this will necessitate drinking a large amount for each cup.

Men must consume all cups of wine while reclining on their left side. If one drank either of the first two cups without reclining, he must drink again without a Brocho.

Note: Many Kosher wines (and some brands of grape juice in the 64oz. bottles) are not cooked and state “Non-Mevushal.” Therefore, care must be taken as to who handles them. (Most bottles that are cooked say “Mevushal” in English or Hebrew on the label).

Note: Many low-alcohol wines are now available. Some are pure wine while others are a mixture of wine and grape juice as indicated.

MATZO

Only Shmurah Matzo (guarded Matzo), which is made of grain that has been guarded against fermentation from the time of harvest, should be used for the Mitzva of eating Matzo at the Seder. Both hand and machine Shmurah Matzo are acceptable. Over the past many decades there have been many opinions given as to the merits of hand versus machine Matzoh. Most use either one with proper Hashgocho.

Shmurah Matzo has been watched in most cases from the time of cutting of the wheat to protect from unwanted moisture, which may make it rise.

Eighteen minute Matzo is run on machines that are cleaned every 18 minutes to prevent any possibility of the dough rising.

Regular Pesach Matzo has been baked on a machine in under 18 minutes, but the machine will run all day without cleaning in between runs.

Matzo Ashira is any Matzo that contains products other than flour and water, such as grape juice or apple juice. The consumption of Matzo Ashira is prohibited for most people throughout Pesach. Included in this category are: Matzo which was kneaded with fruit juice, egg matzo, tea matzo, honey and spice Matzo and some chocolate covered Matzo. However, this prohibition does not apply to infants or people who are ill. When in doubt, consult your Rabbi.

Even one who is allowed to eat Matzo Ashira, cannot fulfill their Mitzvah of Achilas Matzo (eating Matzo) with it.

Gluten Free Shehakol Matzo: Gefen and Yehuda Matzo company from Israel manufacture imitation Matzoh from Tapioca and Potato Starch. This is an excellent product to eat Erev Pesach and any other time one does not wish to consume actual grain-based Matzo (it is also a wonderful imitation Matzo that can be eaten out of a Sukkah since it is not real Matzo). Obviously, this product cannot be used as a substitute at any time for real Matzo.

For people allergic to wheat, Oat or Spelt Shmura Matzah may often be purchased at your local Kosher markets. Check with them for availability. You may also contact the Lakewood Matzoh Bakery at (732) 364-8757. For more information about Oat Matzos one may look on the website www.Glutenfreeoatmatzos.com.

MEDICINE

Most prescriptions can be filled with Kosher for Pesach medicine. For information on the Kosher status of your medicines, contact your local reliable Rabbi.

Rabbi Bess of Los Angeles has compiled the most detailed reliable list in the U.S. He can be reached at (323) 933-7193. Rabbi Bess together with the Star-K publishes the Passover Directory with this information. Since some prescriptions, unfortunately, are not available with Kosher certification, we will mention some guidelines for
those who must take medicine on Pesach.

1. If one suffers from an illness through which one’s life may become endangered, one may eat Chometz on Pesach and may use any medication needed to avoid a life-threatening situation. This Chometz should be owned by a non-Jew.

2. If someone is ill, but his life is not endangered, he may not eat Chometz on Pesach. However, he may take Chometz medicine under certain circumstances as long as he does not take it in the normal way (i.e. a pill without a cup of water). A Rabbi should be consulted if the need for such medication should occur.

3. Generally speaking, cough syrups and other liquid medicines may contain grain alcohol, and may not be used on Pesach. When one must take medicine during Pesach, his/her doctor should be asked to prescribe medicine without alcohol or capsules.

Many over the counter medicines require no special certification to be used on Pesach. Consult your Rabbi for specific questions. For a complete listing of this year’s Kosher for Pesach vitamins (as well as year-round vitamins) go online to www.koshervitamins.com.

TOILETRIES

Rabbi Bess lists the following ingredients as possible Kashrus issues connected to Pesach:

- Amino Peptide Complex, Amp-Isostearoyl

FROZEN VEGETABLES

There are many issues concerning the use of frozen vegetables for Pesach. Most large companies, such as S&W, Green Giant and Bird’s Eye, purchase their vegetables from many different processors. Due to increased competition in this industry from Mexico and Guatemala, many packers are processing pasta and vegetables in the same blanching equipment when it is not being used for pure vegetables. This is done at temperatures between 100 to 200 degrees, thus making the machinery Halachically unacceptable for Pesach use. However, some companies use steam blanchers, which are not usable for pasta. Bodek, Garden Pure, as well as others carry many frozen vegetables which are certified for Pesach.

FRESH VEGETABLES

In general, fresh vegetables do not pose a special concern for Pesach. However, fruits and vegetables from Israel require that Terumos and Maasros be taken. Leafy vegetables require the same level of inspection for insects as during the rest of the year. This is a particular concern for many who use romaine lettuce for the Mitzvah of Marror. To avoid this problem, some choose to use romaine stalks only, which are easier to rinse and check for insects. There are romaine lettuce stalks and other produce certified for Pesach that are not checked for insects. One needs to make sure that the Hechscher covers both the Pesach and insect issues. This year additional care must be taken that no Shmitta issues exist.

SODA

When determining whether a type of soda is Kosher for Pesach, there are three major ingredients with which we are concerned. They are: brominated vegetable oil, flavorings and sugar.

Corn syrup, which is made from Kitniyos, is a common sweetener in soda. The other ingredient, “flavoring,” is also a source of concern, since there are thousands of flavors, many of which are not Kosher, and others that are derived from Chometz. Therefore, even Sephardim who normally consume Kitniyos on Pesach should seek only those products reliably certified to be Chometz-free.

Generally speaking, flavoring is the key to a product’s success in the food market. Therefore, its formula is always a highly guarded secret of the company. Even a minuscule change in the formula of a product where flavoring is concerned can prove to be disastrous. Therefore, it is not surprising that these companies guard their flavorings very carefully making it necessary to have a Mashgiach (supervising Rabbi) go to the plant to personally check the flavorings being used. In regard to Pesach, it is also important to note that even within the same company (Coke, Pepsi, etc.) any individual bottling plant throughout the country may choose to use corn syrup as a sweetener. For this reason as well, it is essential that a reliable Mashgiach be on the premises during production. There are thousands of flavorings used by the food industry, not all of which are Kosher (let alone for Pesach). Some, such as ambergris (from whale intestines) and civit absolute (from cats) are, of course, never

Kosher. Even if an individual knows that a soda is reliably certified Kosher for Pesach in one particular city, this does not mean that the same brand of soda is Kosher elsewhere.

Note: Commonly, Coke and others will be reliably certified for Pesach. The bottle, however, may list “corn syrup/sugar” as an ingredient. As long as the product bears a reliable Pesach certification, the soda has been reformulated to meet all Pesach concerns.

Note: Coke is being produced for Pesach in California this year. Coke will be available in Boston, Baltimore-Washington, Miami and Atlanta as well. All the Passover Coke items will be marked with a distinctive yellow cap in addition to the O/UP symbol on the cap or shoulder of the bottle.

EGGS
It is best to buy eggs that were laid before Pesach. This is due to the fact that chickens are usually given feed which is Chometz. Therefore, there is a minhag (custom) not to eat eggs which were laid on Pesach.

Note: eggs do not require a Hechscher.

MILK
Due to the modern pasteurizing processes used in the milk industry, many nutrients are inadvertently removed.

Governmental regulations dictate that Vitamin D, and in some cases, Vitamin A be added to milk before its sale. The amounts added are very minute. Inasmuch as Vitamins A and D are often derived from Chometz or kitniyos, and since mixtures of even small amounts of Chometz on Pesach are not “batel” (annulled), we must be cautious concerning milk which contains these additives.

Another matter of concern is the processing equipment. Milk companies often produce chocolate milk on the same equipment that they use for their plain “white” milk. The chocolate milk may contain malt, which is made from grain. In order to avoid these problems, two steps are necessary. First, it is necessary to make sure that the dairy company whose milk we purchase for Pesach processes only plain “white” milk and not chocolate milk. Secondly, the milk that we need for all of Pesach must be bought before Pesach. By doing so, the vitamins in the milk are deemed “batel” (annulled) from before Pesach (since Bitul works if the mixture occurs before Pesach), and therefore, may be used on Pesach. Whenever possible, certified Kosher for Passover milk is preferable.

MILK SUBSTITUTES
Many people i.e. infants, elderly, those who are ill etc. often warrant consuming kitniyos but not Chometz. The following products (partial list) are free of actual Chometz:

- Infant Formula - Alsoy, CVS, EnfaCare, Enfamil, Enfapro, Giant, Heinz Nurture, Isomil, Mother’s Choice, Nestle Good Start, Next Step, ProSobee, Rite Aid, Safeway Select, Similac, Target, Walgreens, Wegmans.
- Soy Milk - 365 Everyday Value (original, Light and Unsweetened), Fit & Active, Hy-Vee, Market Basket (unsweetened), Meijer, Nature’s Place, Nature’s Promise Organic, Shop Rite, Stop & Shop.
- Almond Milk - 365 Everyday Value, Kroger, Market Basket, Meijer, Nature’s Place, Ralphs, Shop Rite, Trader Joe’s.
- Rice Milk - Original Clearly Organic, Harris Teeter, Krasdale Organic, Meijer, Nature’s Promise, Rice Dream (unsweetened only), Shop Rite.

Note: all of the above are best in liquid form and bought before Pesach.

OIL
Oil from olives, palm, coconut and walnuts are acceptable for Pesach with a proper Kosher for Pesach Hashgacha. This is because the fruits they are extracted from is not kitniyos. Minchas Yitzchok (lll:138:2) suggests that cottonseed oil is kitniyos, but in a subsequent teshuva (IV:113:3), he reconsiders this position. In the U.S., cottonseed oil is generally not considered to be kitniyos but in Eretz Yisroel there are those who refrain from using it.

Extra Virgin Olive Oil with reliable Hashgacha (year-round) is recommended for Pesach use, even without special Pesach certification.

SUPERMARKETS
One of the major conveniences that is enjoyed in many parts of the United States, is being able to shop in our large National supermarket chains for Kosher items all year and in particular, for Pesach. Along with this convenience, however, comes a responsibility to check well for the Pesach certification on each item we buy. It is not uncommon for non-Pesach items to be found on the Pesach designated shelves.

MARSHMALLOWS & GELATINS
Although many “Kosher for Passover” marshmallows are presumably made without Chometz ingredients, nevertheless, they may contain an ingredient which is highly controversial (for year round use), namely, gelatin. The main sources of gelatin are cattle and hogs. The process of making gelatin is as follows: the collagen in the bones and skins of the animals is converted by soaking 2”x 3” strips of hide in hydrochloric acid until it turns into ossein. This is then soaked in lime for about a month. It is
then washed in sulfuric acid to obtain the gelatin.

In 1912, Rav Chaim Ozer Grodzenski ZT"L sent a response to the Royal Gelatin Company concerning the methods of obtaining Kosher gelatin from non-Kosher hides. Additionally, in 1950, Rav Lazer Silver vehemently opposed the hechsher on a well-known gelatin product. In 1966, Rav Moshe Feinstein ZT"L and Rav Aaron Kotler ZT"L both opposed all gelatins that were not obtained from a Kosher source. Kosher gelatin, from Kosher slaughtered animals, tends to be too expensive for large companies to produce. This is the reason that the O/U, O/K, Star-K and other reliable certifying agencies insist upon a gelatin substitute in products which would otherwise need gelatin. Marshmallows are a prime example of such a product. Some acceptable substitutes for gelatin are: Japanese gelatin, Japanese insinglass, agar agar, Chinese moss, Irish moss, carrageenan. Surprisingly, there is even one marshmallow product being sold which states “Kosher Beef Gelatin” which is produced from dried beef bones from India, which were not Kosher slaughtered. There is a new type of fish gel that is presently being used in pharmaceuticals and some food products certified kosher. Fortunately, a truly reliable certified kosher gelatin obtained from Glatt Kosher hides is being produced under the supervision of the O/U. This gelatin is used by Tzali’s, Golden Fluff, Manischewitz and Granny’s marshmallow brands.

Today, 90% of gelatin produced in the U.S. is made from the skin or hides of pigs, since it is much cheaper than making gelatin from cow bones. Fish gelatin, therefore, is the most commonly-used kosher gelatin in modern times. The Gemara Pesachim 76b says that it is dangerous to eat meat and fish together. Nevertheless, many Poskim allow fish marshmallows with meat since the amount of gelatin (fish based) is very little and considered to be “Batel”. Therefore, it is common today to find kosher marshmallows with kosher “fish” gelatin, under reliable Hashgachas.

PET FOOD

One of the many challenges of Pesach is finding halachically permissible pet food. There are two separate Kashrus issues about which one should be aware. One is related specifically to Pesach, and the other related to the rest of the year as well. The year round problem concerns the mixing of milk and meat. It says three times in the Torah “Lo Sevashel Gedee Bachalev Imo”. Literally, this is a prohibition against cooking milk and meat together. However, from the fact that the Torah states this three times, and uses the term Gedee (kid), the Gemora (Talmud) in Chulin (113A 115B) explains this to mean that milk from any kosher species and meat from any kosher species (i.e. beef mixed with cow’s milk or goat’s milk etc.) are forbidden to: a) be cooked together, b) be eaten together, c) derive benefit or pleasure from them. These prohibitions (from the Torah) do not apply to poultry or venison. In order to avoid confusion, the Rabanan (Rabbis) extended the prohibition of eating milk and meat together to include poultry and venison. However, deriving benefit from poultry mixed with milk was not included in this decree. Therefore, chicken with whey, milk or cheese is permissible in pet food.

Commonly, dog and cat foods contain milk and meat mixtures, and therefore, are forbidden to Jewish pet owners all year round. There is an additional problem for a Jew who is a pet owner during Pesach. The basis for this problem is that Chometz carries with it three “Isurim” (prohibitions) a) Hanaah (benefit), b) Ownership, c) Baal Yimatze (it must be completely removed from a person’s premises). A person who owns a pet is obligated to feed it in a timely manner, and due to the prohibition of deriving any pleasure or benefit from Chometz, we are not permitted to use or own pet food containing any type of Chometz on Pesach. Therefore, it is important to be aware of the prevalent use of the five grains: wheat (germ, cracked, flour, gluten, ground, middlings, starch), rye, barley (cracked flour), oats (flour, grouts, hulled) & spelt in dog and cat foods today. Other Chometz ingredients are Brewer’s Yeast, Gluten, Malt, Pasta, Starch and Xanthan Gum. Almost all dry pet foods list wheat or oats as their first ingredient. This is true for fish food and bird foods as well.

Note: Only clay or wood-based Kitty Litter may be used on Pesach, as others may contain Chometz.

Additional Animal-Related Concern: Often the products that one may purchase at a local zoo to feed the animals contain Chometz and should not be purchased or fed to the animals on Pesach.

**FISH FOOD**

Fish food and vacation blocks often contain chometz. The following are acceptable fish food for Pesach:

Zoo Med Laboratories Giant Plankton Banquet Block Feeder and Tetra Tropical Slow Release Gel Feeders (Tetra Weekend 5 days and Tetra Vacation 14 days). Goldfish and tropical fish can be fed the following (provided they do not contain fillers): Tubular worms, frozen brine shrimp and freeze dried worms.

**BIRDS**

(Parrots, Parakeets, Cockatiels, Canaries and Macaws)

Millet, canary grass seed and sorghum as main diet.

Peanuts, sunflower seeds and safflower seeds

Larger birds such as parrots can eat pure alfalfa pellets (make sure it is pure alfalfa since it is common to add grains) or dry dog approved dog food. They also enjoy safflower seeds and sunflower seeds.

Smaller birds can also have pure alfalfa pellets, crush before feeding

One can supplement with cottage cheese, rice cakes (birds like these), small pieces of lean meat, matzah, berries, grapes, eggs, canned baby fruits. All large food should be shredded before feeding to birds. And these items should be given sparingly.

For minerals, can only have oyster shells (calcium) or mineral block, such as Kaytee Tropical Fruit Mineral Block Treat.

Canaries may be fed canary grass seed and rape seed.

**HAMSTERS, GUINEA PIGS, GERBILS & RABBITS**

It is best to feed pure alfalfa pellets to these animals. Make sure the pellets are pure alfalfa since it is common to add grains. Dried alfalfa may also be given.

One can also supplement with mixture of cut-up fruits and vegetables such as: carrots, broccoli, apples, melon, kale, parsley, oranges, celery, dry corn, sunflower seeds and cabbage. One can also give Matzah. If the animal is not used to eating any of these items, give sparingly.

Guinea pigs, rabbits & chinchillas especially will benefit from greens, oranges, Timothy hay, grapes, apples and melons. Guinea pigs will particularly benefit from kale, parsley and oranges.

Hamsters especially will benefit from sunflower seeds, potatoes, small amounts of greens and vegetables. You can also supplement with grapes, apples, melon and oranges. Give sparingly, if animal is not accustomed to these foods.

Guinea pigs need vitamin C added to their diet.

Mice and rats will eat sunflower seeds, greens, vegetables and potatoes.

Gerbils enjoy eating millet, sunflower seeds and safflower seeds.

**MORE PET FOOD INFORMATION**

Mixes sold in stores often contain chometz. It is advisable for pet owners to slowly wean their pets off their regular chometz pet food diet. This is best accomplished by mixing regular and Pesach food between one and two weeks before Pesach before switching completely to Pesach food. The ratio of regular and Pesach food should be changed slowly to get the animal used to the new diet. Check with your vet before changing your pet’s diet.

**ALERTS**

- Be careful to check packages of Kosher-for-Pesach items for the Pesach certification. Some non-Pesach Kosher products have similar packaging to those products that are Kosher for Pesach and can be easily confused.

* Some brands of Finger Paints, including Elmer’s, contain wheat or oats and should be either used before Pesach or sold and put away with the Chometz.

- Not all Elite products bear recommended Hashgachos. Check the label for proper Hashgacha.

- Caution should be used when buying Matzos to
be sure that they are not Chometz or in the category of “Matzah Ashira”. Some examples of this are Manischewitz White Grape Matzo, Grape Bit Crackers, Egg Matzo, Egg Matzo Crackers, Egg Matzo Snack Bits, Chocolate Covered Egg Matzo and Tam Tam crackers. These items are only permissible for the elderly, ill, or young children who are not able to properly digest regular Matzah. Yehuda Matzah Co. from Israel as well as Glick Matzos also makes a Matzah look alike as well as crackers from tapioca starch. It is properly certified O/UP however keep in mind that the Bracha is Shehakol and that they are not real Matzah for any time that Matza is needed.

- “Pure Honey” from China has been found to be adulterated with corn and rice syrup. One brand was found to not even contain honey.

- Zoo Alert: Be careful when visiting a zoo during Pesach not to purchase animal food to feed the animals from the zoo, as most of them contain Chometz.

- All ground processed spices need Hashgacha for Pesach (even pure spices).

- Many types of cheese bearing reliable certification have a similar variety certified for Pesach and non-certified for Pesach.

- There is a printing error on Gefen Pitted Manzanilla Olives with expiration date of Nov. 22 2019. The Hebrew wording states it IS Kosher for Passover Pareve, and the English wording states “Not for Passover Use.” Please note that this product is NOT Kosher for Passover.

FROM THE STAR-K:

- Terra de Lyssa Organic Infused Olive Oils bear an unauthorized Star-KP. These oils are NOT authorized to bear the Star-K and are NOT Kosher for Passover.

- Palmero Olive Oil with a Star-KP are still in stores. These products are NOT certified by the Star-K and are NOT usable for Pesach.

- Palmero First Cold Pressed Extra Virgin Olive Oil bears an unauthorized Star-KP. This product is NOT certified for Pesach and Is NOT usable for Pesach.

Check www.Star-K.org/quinoa for updates of wholesale and retail suppliers.

FROM THE O/K:

- FS Sanka decaffeinated instant Coffee individual packets labeled O/K, packaged in boxes labeled O/ KP are Kosher for Pesach and permissible to use.

WHISKEY ALERT

(concerning Chometz She’Ovar Alav HaPesach)

AKO: ASSOCIATION OF KASHRUS

ORGANIZATIONS

We recommend that Kashrus Agencies and consumers change their policies and only consume those alcoholic beverages which [are free of standard Kosher concerns and] are known to

(a) Be produced by a non-Jewish company or a Jewish-owned company which arranged for the sale of their Chometz

(b) Not contain any Chometz, including not having Chometz secondary grains or malted barley (bourbon and cordials are examples of items that may have these forbidden items), and/or

(c) Were not aged over Pesach (e.g. vodka).

For a Current List of Possibly Problematic Liquors Due to Chometz She’Avar Alav HaPesach according to extensive research of the cRc please check www. crcweb.org
